

HERBICIDAL GEOFABRIC

Relative Installation Cost	Moderate/High
Life Cycle Cost	
Maintenance/Repair Cost	
Effective Longevity	
Installation	
Repair	
Maintenance	
Retrofit	

Description: Geofabric impregnated with pre-emergent herbicide used as weed barrier under other PVCs

Applications:

- Guardrail
- Sign Post
- Gore/median
- Slope/embankment
- Edge of pavement
- Mow edge
- Median Cable Barrier

Advantages:

- Can be used in most climate conditions
- Uses standard installation/maintenance equipment
- Allows for storm water infiltration

Limitations

- Relative high cost when applied with other permanent vegetation control

Common Problems:

- Easily damaged by road maintenance equipment
